

Ref: 903 ND

Position Type:

Project Manager

Assignment/Scope of Work:

The Senior .NET Developer is expected to take a lead role within the team; develop/enhance/maintain .NET code, ensuring that programming best practices are being followed, prioritizing work effectively, addressing production issues in a timely manner, and writing system documentation when required. The successful candidate should have strong communication skills to be effective in both technical and business requirement discussions.

Primary responsibilities include:

- Ability to develop applications and backend services using C#, VB, ASP.NET MVC, CORE, Web API, Java Script, jQuery, and CSS
- Design and develop using appropriate software design patterns to attain high reusability and maintainability.
- Write effective unit tests and integration tests to ensure high quality software delivery
- In-depth knowledge of system design patterns, tiered architecture, and testing practices.
- Understanding of key business processes and competitive strategies related to the IT function.
- Ability to plan and manage projects. Ability to solve complex problems by applying best practices.
- Ability to provide direction and mentor less experienced teammates.
- Work with project business and system analysts to clarify the requirements and then implement them
- Participate in code reviews
- Enforce standards and best practices

*ALL candidates MUST be able to attend a video call interview, NO exceptions

*candidates will telework (after coming to office in Clifton Forge, VA to pick up laptop. WILL NOT SHIP).
